§6–846.

(a) On receiving the results of a blood lead test under § 6–303 of this title indicating that a person at risk has an EBL greater than or equal to 15 µg/dl before February 24, 2006, or greater than or equal to 10 µg/dl on or after February 24, 2006, the Department or a local health department shall notify:

(1) The person at risk, or in the case of a minor, the parent or legal guardian of the person at risk, of the results of the test; and

(2) The owner of the affected property in which the person at risk resides or regularly spends at least 24 hours per week of the results of the test.

(b) The notices to be provided to the parent or owner under subsection (a) of this section shall be on the forms prepared by the Department, and shall contain any information required by the Department.
